EDUCATION

University of Colorado Boulder

Boulder, CO

B.A. in Computer Science, B.A. in Economics (GPA: 3.96)

Expected May 2028

- *Honors:* Boettcher Scholar, Undergraduate Enrichment Program, Engineering Honors Program
- *Clubs:* CS Undergraduate Advising Committee (Head of Academics), Blockchain Club (Co-President)
- *Relevant Coursework:* Data Structures, Introduction to C++, Algorithmic Economics, Discrete Mathematics, Microeconomics, Macroeconomics

WORK EXPERIENCE

Information Technology Manager, Computer System Administrator

May 2023 – Aug. 2025

Alamosa School District

Alamosa, CO

- Led IT support operations for 3000+ devices across a district serving 2100+ students and 440+ staff
- Oversaw and coordinated a summer tech team, facilitating task delegation, daily standups, and team workflows
- Streamlined laptop imaging processes using FOG Project and FlexOS to deploy standardized system clones efficiently
- Performed hardware repairs on Chromebooks and Windows laptops, including keyboards, touchpads, and screens
- Tracked and managed district-wide device inventory using Incident IQ
- Assisted with infrastructure maintenance, including Ethernet cable routing and workstation setups

PROJECTS

Git Infrastructure & Automated CI/CD Pipeline | *Containerization, Gitea, PostgreSQL, Nginx, Python*

- Engineered and deployed containerized Git infrastructure leveraging Docker Compose to orchestrate Gitea and PostgreSQL services for efficient version control and code hosting
- Established a secure Nginx reverse proxy with SSL/TLS termination to enforce HTTPS, provide clean URL routing, and act as single, unified access point for the multi-service architecture
- Developed a comprehensive CI/CD pipeline using Gitea Actions to automate testing, building, and deployment of applications upon code commits, enhancing development workflow efficiency
- Built event-driven automation using a custom Python script that validated webhooks with HMAC-SHA256 signature verification, establishing push-to-deploy workflows

Distributed Blockchain Network | *C++, Sockets, Multi-threading*

- Built proof-of-work blockchain in C++ featuring SHA-256 mining, transaction validation, and peer-to-peer networking with automatic distributed consensus
- Implemented multi-threaded TCP server handling concurrent peer connections with mutex-protected shared state and JSON-based message protocol
- Designed chain synchronization algorithm enabling nodes to automatically adopt longest valid chain, resolving conflicts through cryptographic validation

LEADERSHIP

Founder, Grant Manager

Jan. 2022 – Aug. 2024

Minds In Shape

Alamosa, CO

- Led a mental health initiative that secured \$10K+ in grants and increased student support-seeking by 30% at Alamosa High School
- Presented at the Aurora Institute Symposium on leveraging youth-driven approaches to destigmatize mental health
- Organized and managed weekly meetings with students and faculty

TECHNICAL SKILLS

Languages: C++, Python, Bash, HTML/Sass

Technologies: TCP Sockets, Multi-threading, Docker, CI/CD, Git, Linux, Nginx, PostgreSQL

Tools: Jekyll, FOG Project, Incident IQ, FlexOS
